

Aluminum Workstation

For The Collision Repair Industry

Solution for Aluminum Repairs

The Car-O-Liner Aluminum Workstation is designed to provide a solution for aluminum auto body repairs. Avoid galvanic corrosion by keeping your tools separate. With this dedicated tool storage, you will reduce the possibility of cross-contamination with steel particles. And with a built-in work area, you can complete your jobs efficiently in one place.

Unique Lightweight Carbon Fiber

The unique advantage of the Car-O-Liner Aluminum Workstation comes from the design of the tools included. The dent pulling bars are constructed of light weight carbon fiber making them lighter and 3 times stronger than steel! These exclusive tools offer the advantage of ease of use without compromising the strength of the tool.

Aluminum Workstation
WSW9-APW

Industry-Leading
Extended Length
Side Dent Removal Tool
